## **Coastal Medical Pediatric Vaccination Policy**

Coastal Medical is committed to providing the very best compassionate, evidence-based care to all our patients. We are confident that timely, complete vaccination is an essential part of that care. Vaccinations protect your children, other children in our office, and everyone in the community from potentially life-threatening illness. We consider it our duty to provide these protections. There are some children in our practice that are too young to be vaccinated or have illnesses that preclude them from vaccination. Their safety depends on the rest of us.

We firmly believe that all children and young adults should receive all the recommended vaccines according to the schedule published by the Center for Disease Control and Prevention and the American Academy of Pediatrics.

**Therefore, we will not accept any patient who intends to forgo any of these [vaccines recommended by the CDC](#).**

If you have any questions, please contact the practice manager at your child's Coastal pediatric office.

Thank you for trusting us with your family's healthcare.
